

# 4 AXIS CNC Wood Turning Lathe Carving machine

## Application

Model	KCP-CWT 4. -4Axis cnc wood lathe
Working area	1500mm(length)*300mm (diameter) when one spindle work
Whole Machine	Stable and low inertia
Spindle motor	Servo motor, 4KW frequency spindle CVT (belt-type drive, easy to replace)
Inverter motor	Fuling(high-end brand)High-precision motor drive, through the program calculates, can ensure the accuracy of processing
Feeding parts	Combined high-quality rails with precise screw drive , effective control error
Working speed	5X60cm Standard staircase column 40S/one
Auxiliary hardware and software	Turning center with the knife (5cm wood, 6cm wood) tail top pin manual stretching, combined with pneumatic, convenient and flexible, intelligent protection work table (limit alarm system) to prevent the collision phenomenon
Control system	Original DSP control system support 4axis
Software supported	TYPE3/ARTCAM/UCANCAM/CAXA/ MASTERCAM/Other software output code
