

# Fish Feed Pellet Making Machine

## Application:

Corn, soybeans, animal waste, etc., can be fed as raw materials and then extruded into different nutrient rich products (usually neat and smooth pellets) in modified shapes and improved taste. These pellets are suitable for feeding fishes, birds, dogs, cats, rabbits, shrimps, etc. These equipment enjoy high demand among professional farmers, small to medium sized feed mill owners, and are also employed across research institutions for various purposes. When pellets extruded by these equipment are fed to fishes, they can improve resistance of fishes to different diseases.

Model	Power	Feeding Power	Cutting Power	Screw Diameter	OutPut Kg P/H
DAM-20-C	20HP	0.5HP	1Hp	60MM	150-200

# Cow Dung Log Making Machine

Minimum Order Quantity	1 Piece
Phase	1 or 3 Phase Option
Raw Material Processed	Cow Dung
Production Capacity	0-500 kg/hr
Output Ball Size	65 mm
Automation Grade	Automatic
Briquette Shape	Cylindrical or Square
Briquette Size	65 mm

# Plastic Scrap Grinding Machine

# Wood Saw Dust Machine
