

Vertical Riveting Machine

Model	TLPVR-10
Weight	80KG + packing in wooden cases 18KG
Size	46 * 57 * 150 cm
Voltage	220V /380V
Working Stroke	150mm
Pressure	5-10 mpa
Minimum Rivet Diameter :	6mm
Maximum Rivet Diameter:	12mm

The Scope of Application of Vertical Riveting Machine

This machine is suitable for all types of truck brake shoes, rivet diameter range from 6-10mm. Suitable for truck brake shoe diameter 320-430mm,430-560mm. Not limited to truck brands.

The Use of Vertical Riveting Machine

This machine is mainly used for riveting truck brake shoe rivet. When the friction material above the brake shoe needs to be replaced with new friction material, the rivets can be riveted directly with this machine.
