

All-In-One Machine For Bearing Oil Filling And Cleaning

Model	TLPBFC-1
Weight	250KG + Wooden Case 30KG
Size	57* 100 * 115 cm
Voltage	220V /380V
Cleaning Time	4-6 Minutes
Heating Temperature	60 Degrees (refueling heatingtemperature 40 degrees)
Clean Bearing Aperture Range	20-180mm
Bearing Oil Filling Aperture Range	45-180mm

► The Purpose of Bearing Oil Filling Cleaning Machine

This machine is mainly used for cleaning bearings and removing waste lubricating oil from bearings. When the bearing cleaning is completed, use the oiling function to fill the bearing with new lubricating oil. The machine can continue to work in cold winter because of the built-in heating function. The machine is equipped with waste water recycling function, and the cleaning agent can be recycled for many times, saving environmental protection.

► The original intention of the design of the all-in-one bearing oiling cleaning machine

The company's research and development of the machine is mainly to liberate workers' hands, save working time, improve work efficiency, reduce labor costs, step by step to replace labor machine. This machine can be used to clean the bearing while oiling the bearing, very convenient and fast. Bearings can be cleaned even in a very low temperature environment, because the machine has a reservation heating function.
