

Bearing Pushing Machine For Conveyor Idler

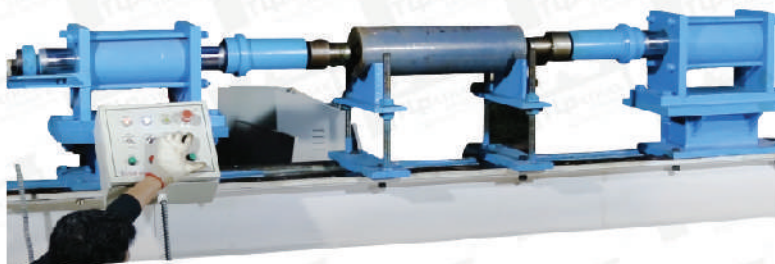

Bearing and Dust Cap Fitting Machine

HYDRAULIC PRESS FOR BEARING and DUST CAP FITTING is a hydraulically operated twin head press with the arrangement of adjusting the pressure of the two heads independently so that either both the heads can be used for bearing fitting or one can be used for bearing fitting and another can be used for fitting dust cap or anything else. Depending on the length of the idler, the distance between the piston of the hydraulic cylinder and steady rest can be adjusted.

Available in 2 options Horizontal (Double End Bearing Pushing)

MAX : 200 mm
PRODUCTION : 250 - 300 PC / Day
PRESSING LENGTH : 250 mm - 2200 mm

TL PATHAK BRAND make Twin Head Bearing Fitting Machine complete with Hydraulic Power Pack, complete with 3 sets of Mandrel for pushing the bearing.

Vertical (Single Side Bearing Pushing)

MAX : 60 mm
PRODUCTION : 465 PC / Day
PRESSING LENGTH : 800 mm Max.

TL PATHAK BRAND Vertical type Twin Head Bearing Fitting Machine, suitable for 60mm Bearing (max.)
