

Scaffolding Welding Automation

Ledger post are used with combination of Cuplock welding to make a structure. All the components are used in combination of each other, Base jack welding machine, Inner prop welding machine, Outer prop welding machine, Cuplock welding machine, Ringlock welding machine.

WE provides complete solution for scaffolding and formwork by providing Automatic scaffolding machines.

Automatic Ledger Welder

Automatic Ledger welding machine is used to weld ledger blades with pipe without making any joint between them, It gives high production and accuracy to product.

Item	Supply	Phase	Frequency	Speed	Motor drive	Motor	Torch Clamping	Length Adjustable	Dimesions
Unit	V	Nos.	Hz.	RPM	TYPE	TYPE	TYPE	mm	LxWxH
Ledger welding Double Side	220±10%	SINGLE	50/60	2 to 10	AC Inverter Type	AC 220-Volts 3-Phase	PNEUMATIC	150 to 2400	11.3x2.5x5.3 (Foot)

Automatic Inner Prop Welding Machine

Automatic Inner prop welding machine is used to weld base plate with pipe without making any joint between them

Item	Supply	Phase	Frequency	Speed	Motor drive	Motor	Torch Clamping	Length Adjustable	Dimesions
Unit	V	Nos.	Hz.	RPM	TYPE	TYPE	TYPE	mm	LxWxH
Inner Prop.	220±10%	SINGLE	50/60	2 to 10	AC Inverter Type	AC 220-Volts 3-Phase	PNEUMATIC	150 to 2400	11.3x2.5x5.3 (Foot)
Outer Prop.	220±10%	SINGLE	50/60	2 to 10	AC Inverter Type	AC 220-Volts 3-Phase	PNEUMATIC	150 to 2400	11.3x2.5x5.3 (Foot)

Automatic Cuplock Welding Machine

Automatic Standard cuplock welding machine is used to weld six cups at time with pipe with making a tag between them on tagging fixture.

Item	Supply	Phase	Frequency	Speed	Motor drive	Motor	Torch Clamping	Length Adjustable	Dimesions
Unit	V	Nos.	Hz.	RPM	TYPE	TYPE	TYPE	mm	LxWxH
Ledger welding Double Side	220±10%	SINGLE	50/60	2 to 10	AC Inverter Type	AC 220-Volts 3-Phase	PNEUMATIC	150 to 2400	11.3x2.5x5.3 (Foot)
