

Tea Garden Machinery

Lathe Machine with Chasing attachment

Crush, tear, curl (sometimes **cut, tear, curl**) is a method of processing black tea in which the leaves are passed through a series of cylindrical rollers with hundreds of sharp teeth that crush, tear, and curl the tea into small, hard pellets. This replaces the final stage of orthodox tea manufacture, in which the leaves are rolled into strips. Tea produced using this method is generally called **CTC tea** or **mamri tea**.

CTC Roller Helix Milling Machine

CTC HELIX ROLLER'S

Heavy duty CTC Segment Helix Milling Machine, suitable for milling 50, 60, 70, 75, 100 Helical grooves by means of an exclusive indexing device fitted on Dividing head, complete with std. access. such as : 4 speed gear box and , -, micro dial duly fitted with Electric motor, starter, Limit switch, Coolant pump with tank. Machine having length of bed 8ft-6, Width of bed 16, Height of centre 13.
